

Al Dayag joined Aluminum Blanking Company, Inc. in 2020 from Arconic Aluminum after servicing seven years as Customer Technical Project Engineer in Aerospace and Automotive Products. With this role he oversaw product design, launches, service and quality assurance for programs serving seven OEM customers throughout North America. His role also included engineering design and formability studies working with each OEM from new business development through early vehicle involvement, product launch, and production tryouts.

Al studied at the Mapua Institute of Technology and University of the Philippines, after which he served as a Metallurgical Engineer and Manager for various manufacturing, steel, and nuclear materials and service corporations leading product design, procurement, technical evaluation and certification efforts.
