

Chad Elliott serves as the Operations Manager at Aluminum Blanking Company, Inc. where he is responsible for operational throughput, scheduling, plant supervision, material handling, pallet construction, custom packaging and scrap management for over 175,000 square feet of processing, warehousing and custom packaging space.

Chad has over 20 years' experience in the manufacturing, automotive and commercial industries. He has overseen the processing of over a billion lbs. (450,000MT) of automotive blanks alone and has led the launch and implementation of a range of new equipment capabilities, which has allowed ABCo to offer its customers one of the broadest ranges of processing options (gauges, widths, lengths and weights) in the industry. Chad has conducted site assessments for nearly every aluminum mill in the United States, and often travels to China and Canada to support evolving customer requirements and initiate Kaizen events for Aluminum Blanking Company, which has resulted in significant cost savings and has led to new business award opportunities.

Chad also serves as the company's in-house operations expert for evaluating the company's value added service offerings. He has implemented over a dozen value-added services over his career, resulting in enhanced product offerings and heightened customer experience.

Chad is married with a teenage son and daughter.
